

Welcome Welcome, to our today's interesting show! As you all probably know, the world can be sometimes rusty. The news is one big rollercoaster. Wall street is tricking us. People killing people. Refugees everywhere. And so on. We don't know what we are experiencing and seeing. What to believe and what not. Who to trust and who not...

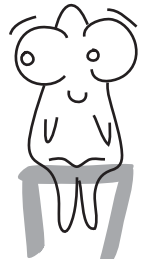

HUMANITY

HUMAN

...Well, to discuss this, we have invited two special guests, who will try to answer the question: 'how to build a better world'. Our first guest has over thousands of years of experience on this planet and is named Human! Our second guest is a bit more abstract and eternal and is known as Humanity! Give them a big applaud.

So Human, how could we create a better world according to you?

HUMANITY

HUMAN

Well, we should focus more on education, healthcare, create more jobs and equal pay.

HUMANITY

HUMAN

Why do think that this is the best approach? Do you really and honestly think that it would solve our world issues?

Well, yes! We humans basically want to survive and live. We are made of animal instincts and emotions. A lot of emotions.

HUMANITY

HUMAN

Alright, interesting. So, Humanity. You have just heard Human talk. What's your opinion?

I actually do not agree with Human, since I certainly do not reduce humans to physical and materialistic stuff...

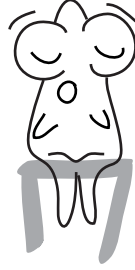

HUMANITY

HUMAN

Have I also mentioned that we should talk and listen to each other? It's important to...

Please Human, don't interrupt Humanity...

...take time and listen carefully to other humans.

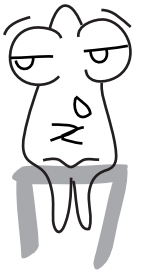

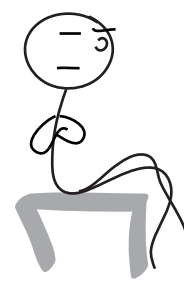

HUMANITY

HUMAN

Once again you are missing the point here. The proposition you are making has already been done before and we know that it hasn't worked.

Humans are complex creatures and require complex measures.

That might be so, but it doesn't necessary require complex measures.

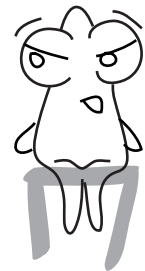

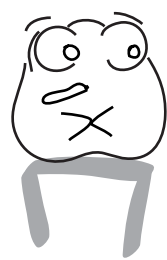

HUMANITY

HUMAN

Do you even agree with something I have just said?

No, actually I don't...

So all of these years, that we have been doing it this way, hasn't helped a bit?

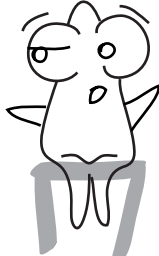

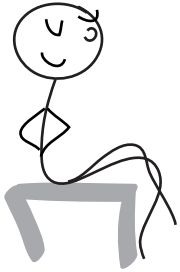

HUMANITY

HUMAN

Well, it did something but...

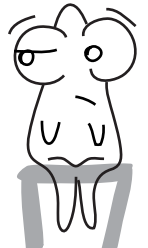

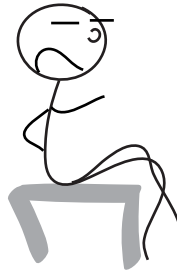

Choose your words wisely...

...the change that you have achieved is not at all durable and or sustainable.

Alright, alright. Let's not get heated over here. But Humanity, what do you propose?

I would recommend everyone to stop talking, listening and whatever they are currently doing or are busy with.

Well, tell that to women...

It's important for humans to remove all the noise they currently experience in their daily lives...

...impossible!

...in order to truly understand the root cause of everything.

Wrong! Wrong! Wrooong! You have to advocate!

But... But...

No, no... You should not advocate, you should inquire!

Oh man! Give me a break! We have to work and innovate so that we keep busy and forget to fight each other.

Alright, so you...

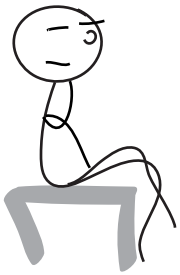

No! That's the wrong mentality. We shouldn't fight each other in the first place!

HUMANITY

HUMAN

We have to change the way we perceive others and ourselves. We are too distracted. Too busy. Too influenced and too restless. We have to create silence and start from the beginning again.

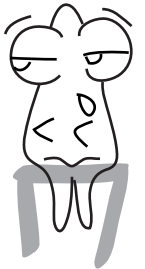

HUMANITY

HUMAN

Ahh come on! Your approach does not require that much money, which also implicitly state that it won't give any results.

Exactly! Not much money needed, but it will give results in the long run.

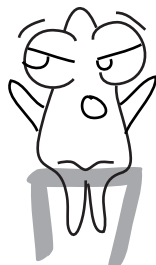

HUMANITY

HUMAN

People will realize what the important things are in life, in connection with other humans. Then the rest, like education, health care, equal pay and so on, will follow automatically.

AARRGG! Humans can't figure this out for themselves.

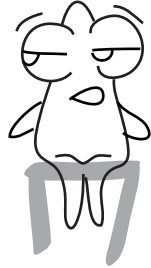

HUMANITY

HUMAN

People are too egoistic and too selfish! They just follow their animal instincts!

Calm down, calm down...

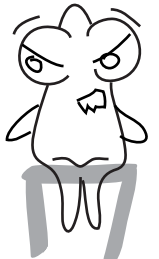

The only way to push them in the right direction is through external factors!

HUMANITY

HUMAN

That's once again where you are wrong. Humans exist, since they think. They have brains and logic. We just need to influence that in a positive manner. And that can only be done by first shutting up and creating the silence.

HUMANITY

HUMAN

HUMAN! Calm down!

WHY YOU...

Keep your emotions together!

...

HUMANITY

HUMAN

You know I'm right!

AARGGHHHH!!

Keep it together man! Security, take him away!

HUMANITY

HUMAN

LET ME GO! LEAVE ME ALONE!

Alright, that's handled.

Hmm...

So...

Yeah. I believe we need to go back. We need to start thinking, because without thinking, humanity would be dead...

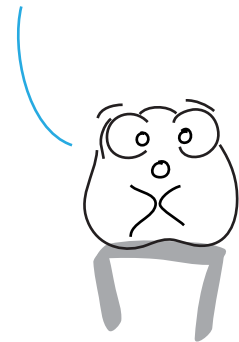

HUMANITY

HUMAN

...and so, we need engineers, lawyers, doctors, teachers, children and so on for collaboration. Thus, basically every level of society needs to be involved and aware of this.

I see...

HUMANITY

HUMAN

Alright, that was interesting. Thanks for the contribution Humanity and hopefully will this approach of yours work for us! Till next time!

HUMANITY

HUMAN

NOO IT WILL NOT WORK!! AARRGGGG

HUMANITY

HUMAN
